

Allentown Integration Introduced at AALAS National Meeting

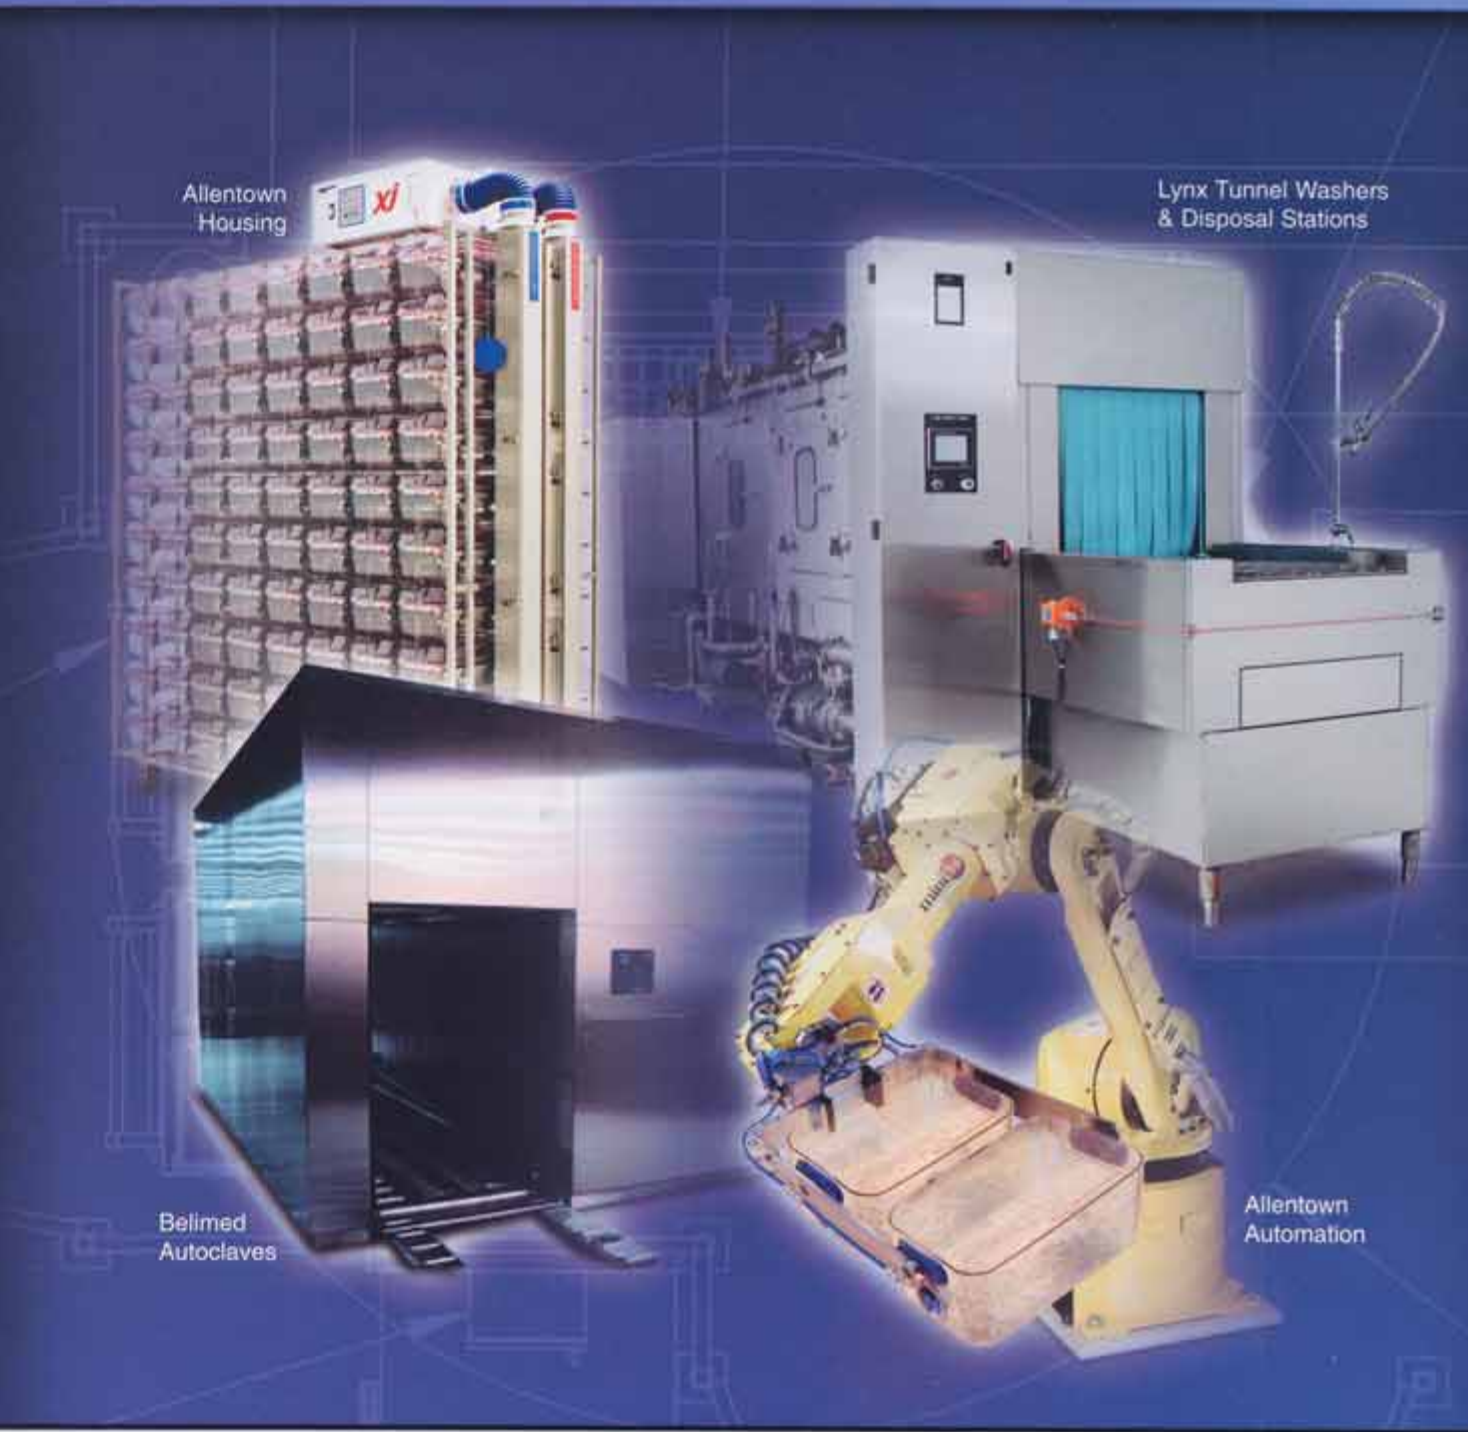

At last year's AALAS National Meeting, Allentown announced the formation of a new entity called Allentown Integration (AI). Comprised of strategic partnerships with leading solution providers, AI offers a complete package of animal housing, cage and equipment washing products, automated solutions, as well as bedding dispensing and removal systems.

"I'm enormously enthusiastic about this new endeavor and excited at the prospect of providing an integrated solutions package," said Michael A. Coiro, Sr., founder and CEO of Allentown. "Our project leadership will allow customers to leverage the expertise and excellence of three different disciplines, yet from a single source."

Allentown Integration is offered as an end-to-end solutions integrator for multi-faceted animal research facility equipment installations, providing researchers with turnkey packages and one point of contact for ease of purchase, installation, implementation, and service.

Typical AI implementations feature IVC housing, material handling equipment, automated processing of soiled cages, automated removal of soiled bedding, clean bedding delivery, cage washing, rack washing and sterilizers, all integrated by Allentown. Our global reach and expertise provides us with a network of partners to bring the best possible facility solutions to the industry.

Allentown, Inc. Partners with Leading Solution Providers for North American Market

Allentown Integration is proud to partner with the following industry leading solution providers:

LYNX Product Group LYNX offers Life Sciences and Healthcare customers the design, build, and reputation of premium brand washing equipment. With an industry heritage spanning over 30 years, Lynx equipment makes the task of cleaning and disinfection easier, simpler and more effective. As part of AI, LYNX will provide washing equipment and bedding management solutions.

Belimed, Inc. The world leader in infection control, specializing in cleaning, disinfection and sterilization. A division of Metal-Zug, a Swiss company with an annual sales volume of approximately \$500 million, Belimed, Inc. has been providing state-of-the-art products in the healthcare, pharmaceutical and laboratory sectors worldwide for over 30 years. Belimed's new US headquarters are in Charleston, South Carolina. As part of AI, Belimed will provide autoclaves and sterilizers.
